DETAILED ACTION

1. The request filed on 22 January 2001 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/320,950 is acceptable and a CPA has been established. An action on the CPA follows.

Note

2. The word "trisoid" is not defined in the instant application or in common dictionaries. However, in the examiner's experience the word "trisoid" means "a closed curve lying in a plane such that for each point (X) on the curve the sum of the three distances (XA, XB, XC) from the point (X) to three given points (A, B, C) in the plane equals a given constant". This interpretation is being used by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 46 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Hung et al. (DE 35 39 195). Note: all page and line numbers refer to the English language translation of DE 35 39 195. Regarding claim 46, Hung ('195) discloses a method of fluid distribution in a chemical reactor comprising the steps of providing a layer of ceramic filter units, at least some of the ceramic filter units having a plurality of elliptical openings (see fig. 3; page 10, lines 5-8); contacting an organic –based feed stream with the layer (see page 7, lines 8-22); and the stream is subdivided as a result

of entering the openings (see page 11, lines 19-20). Regarding claim 47, removing contaminants from an organic stream and providing the stream to a catalyst bed for further processing are disclosed (see page 21, lines 5-7).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David L. Sorkin whose telephone number is 703-308-1121. The examiner can normally be reached on 7:30 - 5:00 Mon.-Thur., Alternate Fridays.
